INFORMATION SYSTEMS CYBERSECURITY

Secure a future for yourself in Cybersecurity, one of the fastest growing, high-paid career fields.

Prepare yourself to be an offensive and defensive player to protect the cyber world.

- Red team, offensive, will attack company systems to find vulnerabilities before the malicious actors hack into it first.
- Blue team, defensive, will learn an implement way to defend company systems from attacks with monitoring and reacting to incidents.

Possible career outcomes from achieving an AAS in Information Cyber Security include:

Security Analyst
Security Architect
Security Software Developer
Security Engineer
Security Administrator
Incident Analyst/Responder
Penetration & Vulnerability Tester

This is not a career field for the faint-hearted. Get prepared for a new battleground.
