

Craig and others,

Looking over the Dental Hygiene materials, the changes seem to be driven by THECB suggestions. The program is revising its criteria in order to retain some prerequisites, and I am not in a position to respond to those proposals.

Assuming the justifications satisfy the THECB, the proposals look fine.

On the DHYG 2275 Generic Course Syllabus, under Attendance Policy it says class participation will affect the final course grade. But under Method of Evaluation, there is no mention of class participation and to what extent it would impact the final course grade. So, it is somewhat unclear as to precisely how class participation is weighed.

Most Respectfully,  
Matthew Ware Coulter  
Professor of History

---

I approve all Dental Hygiene program/course changes.

---

Craig,

The Dental Hygiene course revisions and the new courses seem fine to me.

Joanne

---

Just a quick reminder about the electronic meeting in regards to the Dental Hygiene program. The documents are in your I Drive. Please give me any input, including approvals or issues by the end of the day. Vicki needs our decision by 5:00PM.

Craig

---

Craig,  
The course revisions submitted by Dental Hygiene seem to be fine. I will vote in favor of the changes as presented.

All,

I just have one comment. There is a discrepancy in the number of case studies required for DHYG 2375--five stated on the CRT and WECM Local Needs form and 3 stated on the generic syllabus. How many case studies are actually required? Otherwise I have no objections to the proposals.

Kathy

---

I agree that the number of case studies do not match up. Additionally, the 2nd page of the CTF for the course revision of DHYG-1375 to DHYG-2375 is missing the % for the Dental Hygiene Portfolio (30%). The proposals are straightforward and necessary. I approve these proposals with these minor changes.

Serena

---

Everyone is in favor of the changes except for the discrepancies that Kathleen and Serena mentioned.
