

Accessibility Checkers

UPDATED: JULY 2021

Overview

- An Accessibility Checker is a built in tool that identifies common accessibility issues
- Most software programs have one

Canvas

Flags accessibility issues pertaining to:

- Links
- Small/Large Text Contrast Ratios
- Headings
- Image alt text
- Lists
- Tables
- For more information, visit <https://community.canvaslms.com/>

Microsoft Products

Divides its results into four sections:

- Errors: Content that makes the document difficult or impossible to read and understand for people with disabilities
- Warnings: Content that in most (but not all) cases makes the document difficult to understand for people with disabilities
- Tips: Content that people with disabilities can understand but that could be presented in a different way to improve the user's experience
- For more information, visit <https://support.microsoft.com>

Adobe Acrobat

Flags accessibility issues and divides results into categories:

- Document
- Page Content
- Forms
- Tables
- Lists
- Alternate Text
- Headings
- For more information, visit <https://www.adobe.com/accessibility>

For assistance, contact the eLC at 972.881.5870 or eLC@collin.edu
