Lower-Division Academic Course Guide Manual (Revised 2003)

Introduction

The *Lower-Division Academic Course Guide Manual (ACGM)* is the official list of courses approved for general academic transfer that may be offered by public community and technical colleges in Texas for state funding. Questions concerning the content or implementation of the procedures in this manual should be directed to:

Dr. James Goeman
Academic Program Director
Division of Community and Technical Colleges
Texas Higher Education Coordinating Board
P.O. Box 12788
Austin, Texas 78711-2788
Phone: (512) 427-6249
Email: James.Goeman@thecb.state.tx.us

The provisions for approval of general academic courses for state appropriations are outlined in the *Coordinating Board's Rules and Regulations*, Chapter 5, Subchapter S. Accordingly, the Coordinating Board established an Academic Course Guide Manual Review Committee with equal representation from public community colleges and public universities. This standing committee meets at least twice annually or more frequently as needed to recommend to the Coordinating Board staff appropriate courses to be added to, revised, or deleted from the *ACGM*. The members of the Committee who contributed to this edition of the *ACGM* are listed at the beginning of this manual.

Changes in the ACGM

The 2003 edition of the *ACGM* incorporates new CIP (Classification of Instructional Programs) codes included in the migration to CIP 2000. Institutions should check carefully for approval numbers that have changed.

The 2003 edition of the *ACGM* lists alphabetically by discipline the academic courses that are funded by the state for public community and technical colleges and are transferable to public universities. (For information regarding workforce education courses see the *Workforce Education Course Manual*.) This edition incorporates all course additions and changes summarized in the Summer 2002 *Addendum to the Lower-Division Academic Course Guide Manual*. Course additions include new courses incorporated into field of study curricula or otherwise needed to reflect new curriculum trends.

The ACGM and the Academic Unique Need Inventory

The 2003 *ACGM* serves as the generic academic course inventory for all community and technical colleges in Texas. Individual institutions are not required to maintain separate general academic course inventories for these courses. Courses listed in this manual may be offered and reported for funding without requesting approval from the Coordinating Board.

If a community or technical college wishes to offer a course not listed here, or offer an ACGM course for more credit or contact hours than listed, it must request approval for such a course on the basis of unique need. There are no provisions in the 2003 edition for special topics courses. A resulting inventory of Unique Need Courses is the only academic inventory required of individual institutions. Colleges must continue to report academic courses according to instructions in the most recent edition of the *Reporting and Procedures Manual for Public Community and Technical Colleges* published by the Educational Data Center of the Coordinating Board. All "edits" of reports must be in accordance with the ACGM and the individual institutions' Unique Need Course inventories. The state will not fund academic courses at community and technical colleges that are not listed either in the ACGM or on the college's Academic Unique Need inventory.

Instructions: How to Read and Use the ACGM

The 2003 edition of the ACGM is organized alphabetically by academic disciplines currently taught at community and technical colleges. All common courses listed in the 2003 ACGM have been numbered to correspond to course numbers assigned by the Texas Common Course Numbering System (TCCNS).

Where available, each entry begins with a list of common course prefixes and numbers; for course descriptions with no common numbers currently assigned, a content descriptor (for example, "Environmental Science") is listed. Beneath the course list appears a line listing the 10-digit approval number for the course, the matching content descriptor, and information about maximum semester credit hours (SCH) per student, maximum SCH per course, and maximum content hours per course. This information is underlined. Finally, a brief course description appears.

For example:

BIOL 1106 (*lab, 1st semester, for Biology majors*)
BIOL 1107 (*lab, 2nd semester, for Biology majors*)
BIOL 1306 (*lecture, 1st semester, for Biology majors*)
BIOL 1307 (*lecture, 2nd semester, for Biology majors*)
BIOL 1406 (*lecture + lab, 1st semester, for Biology majors*)
BIOL 1407 (*lecture + lab, 2nd semester, for Biology majors*)
BIOL 1108 (*lab, 1st semester*)
BIOL 1109 (*lab, 1st semester*)
BIOL 1308 (*lecture, 1st semester*)
BIOL 1309 (*lecture, 2nd semester*)
BIOL 1408 (*lecture + lab, 1st semester*)
BIOL 1409 (*lecture + lab, 2nd semester*)

26.0101.51 03 General Biology

Fundamental principles of living organisms including physical and chemical properties of life, organization, function, evolutionary adaptation, and classification.

Lower-Division Academic Course Guide Manual (Revised 2003)

Concepts of reproduction, genetics, ecology, and the scientific method are included.

Approval Number	26.0101.51 03
CIP Area	Life Sciences
Maximum SCH per student	8
Maximum SCH per course.....	4
Maximum contact hours per course.....	96

In this example, the 10-digit approval number is 26.0101.5103. The first six digits of the approval number indicate subject matter and are based upon the new CIP codes implemented for Fall 2003. The Coordinating Board staff assigns the last four digits. The 7th and 8th digits further delineate course content, sequence, or approval category. The 9th and 10th digits indicate the funding category. **Reporting officials should review the approval numbers carefully because some of them have changes.**

26.0101 is the CIP code for General Biology

51 is the code for the content listed in the course description. The range for these numbers is typically 51 to 59. However, if a course is approved as a Unique Need Course (as opposed to general approval), the 7th digit will be a 9 instead of a 5. If a course is approved as a permanent unique need, the 7th digit will be a 7 instead of a 5 or 9. If the course is approved for excessive credit and/or contact hours (more than allowed in the approved listing), the 7th digit will be an 8 instead of a 5 or 9.

3 is the current state funding code for biological sciences in public community and technical colleges. These codes range from 01 to 26.

A complete listing of the academic funding codes is contained in Appendix E.

(IMPORTANT NOTE: The 2003 edition of the ACGM reflects new state funding codes adopted this year. Some of these codes will not match funding codes found in the 2002 ACGM.)

After the CIP descriptor, "General Biology," the maximum hours per student, semester credit hours (SCH) per course, and contact hours per course are listed:

- 8 is the maximum number of semester credit hours (SCH) per student for courses applicable toward an associate degree under this specific approval number. In this example, a college may allow students to take eight SCH of general biology courses and count them toward an associate degree.
- 4 is the maximum number of semester credit hours per course under this specific approval number. In this case, the maximum number is four. A college could offer a course under this approval number for four or fewer SCH, but not more. The college should award the SCH in proportion to the number of contact hours and type of instruction under the assigned common course number.

A traditional Biology (or any other discipline) lecture course offered for three contact hours of lecture over a 16-week semester will earn three semester credit hours and carry a "3" in the second digit of the common course number. Similarly, a traditional lecture/lab course offered for three contact hours of lecture and three contact hours of laboratory over a 16-week semester would earn four semester credit hours and carry a "4" in the second digit of the common course number. In general, one semester credit hour is awarded per one contact hour of lecture instruction and one semester credit hour is awarded per two to four contact hours of laboratory instruction.

96 is the total maximum number of contact hours per course according to this specific approval number. Thus, a college can offer a course under the General Biology approval number for 96 or fewer contact hours, but not more. In this example, a four SCH biology course can be offered for up to a maximum 96 contact hours. During a regular 16-week semester, 96 contact hours in this particular course might be broken down into three hours of lecture per week and three hours of lab per week or into other combinations that total 96 contact hours.

In rare cases, no common courses have been identified for specific approval numbers. Approval numbers for religion courses, listed under the heading "RELI" in this manual, are an example. In such cases, the college may designate its own course prefixes and numbers.

The Texas Common Course Numbering System (TCCNS)

The TCCNS is a cooperative effort among Texas community colleges and universities to facilitate transfer of freshman and sophomore-level general academic courses.

The TCCNS provides a shared, uniform set of course designations for students and their advisors to use in determining both course equivalency and degree applicability of transfer credit on a statewide basis. When students transfer between two participating TCCNS institutions, a course taken at the sending institution transfers as the course carrying, or cross-referenced with the same TCCNS designation at the receiving institution.

For additional information about the TCCNS, consult the following web sites:

The TCCNS Matrix Online (<http://www.tccns.org/ccn/>) is hosted by Texas A&M University at Commerce. This web site contains a list of participating TCCNS institutions, the TCCNS taxonomy, the TCCNS history, and the TCCNS board members. The site also contains the master list of the common courses offered in Texas. The list is organized by institution and by TCCNS designation.

The Texas Higher Education Coordinating Board's web site is <http://www.thecb.state.tx.us>. TCCNS Transfer Guides are available at the site.

Lower-Division Academic Course Guide Manual (Revised 2003)

The Transfer Guides provide information and recommendations regarding specific common courses that students can take at Texas community and junior colleges to ensure degree applicability of transfer credit at four-year public universities. For example, if a student wishes to major in biochemistry and to begin his/her studies at Texarkana College and later transfer to Texas A&M University (TAMU), the student can (and should) consult the TAMU Transfer Guide for biochemistry. This guide will inform the student of exactly which courses to take at Texarkana College.

Addition and Deletion of Courses

At the institution's request, Texas Higher Education Coordinating Board (THECB) staff and the Standing ACGM Review Committee may consider a course for placement in the *ACGM*. If THECB staff members determine that there is continued need for that course at that particular institution, then the course will be presented to the Standing ACGM Review Committee for review. If a majority of the committee votes that the course should be included in the *ACGM*, then the course description used by the institution initiating the request will be evaluated and revised by the committee if necessary.

The Standing ACGM Review Committee may consider information from the following categories to determine whether to include the course in the *ACGM*. The committee may request additional information from the institution submitting the request; institutions are encouraged to submit any additional information for consideration they deem relevant.

NOTE: THE FOLLOWING IS NOT INTENDED TO BE AN EXHAUSTIVE LIST OF INFORMATIONAL CATEGORIES, NOR IS IT INTENDED THAT INSTITUTIONS SUBMITTING REQUESTS MUST SCORE HIGH MARKS IN ALL CATEGORIES.

The information for consideration may include the following:

- Unique Need approval history. Normally the course will have had Unique Need approval for at least the three previous years (one previous year if the course is applicable to the core curriculum).
- The course has met the criteria for inclusion in an institution's course inventory as a Unique Need course for a six-year cycle.
- Course frequency and enrollments for the preceding three years have been adequate.
- The course has current applicability to baccalaureate degree plans.
- Application to the TCCNS. Final approval for inclusion in the *ACGM* may be contingent upon the assignment of a common course number.
- Applicability of the course to the institution's Core Curriculum.
- Frequency of similar courses statewide at both two and four-year institutions.
- Applicability of the course to an academic major or a statewide field of study curriculum.
- Course description.

Lower-Division Academic Course Guide Manual (Revised 2003)

- Consultation with appropriate academic, professional, credentialing, or accrediting organizations.

If a majority of the committee votes that the course should be included in the *ACGM*, then the course description used by the institution initiating the request will be evaluated and revised by the committee if necessary. If a course is not approved by the *ACGM* committee and THECB staff determines that an institution has continued need of the course, the institution may continue to offer the course on a Unique Need basis.

The Standing *ACGM* Review Committee will review and consider a biannual survey of courses in the *ACGM*. THECB staff, using the CBM004 and other means to determine how frequently courses are taught, will conduct the survey. The *ACGM* committee may also consider recommendations for deletion from institutions or academic, professional, credentialing, or accrediting organizations. The course recommended for deletion will be placed under review for at least two years by a majority vote of the *ACGM* committee. THECB staff will contact the institutions still teaching the course to alert them of the “under review” status. Any course under review for two years may be removed from the *ACGM* by a majority vote in favor of removal by the Standing *ACGM* Review Committee.

The basis for deletion may include the following:

- Infrequently offered courses, or low enrollments in courses statewide.
- Lack of applicability to a four-year degree, or obsolescence in a discipline.

Unique Need Courses

Approval for a course not available under an *ACGM* approval number or for one with credit and/or contact hours in excess of the limits prescribed by the *ACGM* must be approved by the Coordinating Board according to the Boards Rules and Regulations. When applying for a Unique Need Course, submit a Request for Approval. Be sure that all information requested is addressed or attached as needed. A copy of this form appears in Appendix B.

For courses to be included in the *ACGM* as Unique Need Courses, each specific course must meet the two following criteria:

1. The course must be acceptable for transfer to two or more Texas and/or regional universities. Copies of letters documenting transferability must be included in the application. The letters must state that the course will be applied to degree requirements, preferably for the core curriculum or a specific major, but at least as elective credit.
2. The course requested must have college and university level rigor. Courses designed to meet a community service, leisure, vocational, or a vocational need are inappropriate for unique need approval and will not receive state (academic) funding.

Lower-Division Academic Course Guide Manual (Revised 2003)

Upper-division courses at community and technical colleges will not be funded by the state and may not be added to the *ACGM*. However, if regional universities decline to offer an upper division course and if that course also meets the two criteria above, a community college may request approval to add the course to its inventory of Unique Need Courses and to receive funding as such. The prerequisites of the proposed course must meet both institutions' prerequisites.

The procedures for Unique Need Approval are:

1. The application for each Unique Need Course submitted to the Coordinating Board must be accompanied by a proposal that states the various needs for the course and a syllabus that includes a course description, detailed course outline, and objectives. This proposal must also document that the course is transferable to two public universities and that it meets the requirement for college and university rigor.
2. Colleges must reapply for approval of Unique Need Courses annually. At the institution's request upon the third consecutive approval, a course may be considered for continued placement in that institution's course inventory. Requests must include the enrollments and frequency with which the course was offered during the preceding two years.
3. Exemptions to the three year approval procedure may be requested if a Unique Need Course is transferable as part of the state's and the Coordinating Board's mandated Core Curriculum. An institution may request that such a course be considered for inclusion after the course has been taught the previous academic year. These requests must include the enrollments and frequency with which the course was offered during the preceding years.

The Coordinating Board staff is currently reviewing its unique need request procedures. If you have suggestions or comments, please send them to Dr. James Goeman at James.Goeman@theccb.state.tx.us.

Distance Learning

For community colleges, distance learning may take the form of instruction offered at distant sites -- out-of-district, out-of-state, or out-of-country -- or instruction delivered primarily by telecommunications technology. Unless specifically exempted by the Coordinating Board, all state-funded distance learning courses and programs must be submitted for annual review to the appropriate Higher Education Regional Councils (Subchapter H, Approval of Distance Learning for Public Colleges and Universities, of the *Coordinating Board Rules and Regulations*, Chapter 5.) The text of Subchapter H is included in the appendix of this manual.

An "Annual Plan" for Distance Learning consists of a listing by location of distance learning courses and programs planned to be taught during an academic year by an

institution. The Annual Plan must include a signed statement of institutional commitment to Distance Learning Standards (see appendix for this form). Each college must prepare an Annual Plan in January for the following academic year. For example, the Annual Plan for 2001-2002 must be prepared in January 2001. The Annual Plan will be submitted by the college to the appropriate Higher Education Regional Council(s) for approval during council meetings in January or February. The Higher Education Regional Councils thereafter make recommendations to the Commissioner of Higher Education regarding the Annual Plans. The Commissioner in turn makes recommendations regarding the Annual Plans to the Coordinating Board at its April meeting.

Colleges wishing to offer academic courses for state funding for which all or part of the courses would be taught outside Texas must obtain prior approval from the Coordinating Board staff. The form needed to request approval for an out-of-state (or out-of-country) academic course appears in the Appendix.

Developmental Courses

Developmental course work may be reported for state reimbursement but does not result in degree credit. Because developmental courses do not transfer, no common courses are listed for developmental approval numbers. Colleges may designate their own course titles but should follow the specified restrictions for number of SCH per student, maximum SCH, and maximum contact hours. The first digit developmental course numbers should be “0” to indicate that the course does not carry credit.

Developmental course approval numbers are listed in a separate chapter of this manual (See Table of Contents).

ARCH 1303 Architectural Design I (3 SCH version)

ARCH 1403 Architectural Design I (4 SCH version)

ARCH 1304 Architectural Design II (3 SCH version)

ARCH 1404 Architectural Design II (4 SCH version)

Introduction to architectural concepts. The visual characteristics of two- and three-dimensional forms and spaces.

Approval Number.....04.0201.54 02
CIP Area.....Architecture & Environmental Design
maximum SCH per student.....8
maximum SCH per course.....4
maximum contact hours per course.....144

ARCH 1205 Architectural Aesthetics (2 SCH version)

ARCH 1305 Architectural Aesthetics (3 SCH version)

Architecture as a contemporary philosophical concept. Visual experiences in the aesthetics of architecture.

EDUC (Education)

EDUC 1300 Learning Framework

(Also see PSYC 1300)

A study of the 1) research and theory in the psychology of learning, cognition, and motivation, 2) factors that impact learning, and 3) application of learning strategies. Theoretical models of strategic learning, cognition, and motivation serve as the conceptual basis for the introduction of college-level student academic strategies. Students use assessment instruments (e.g., learning inventories) to help them identify their own strengths and weaknesses as strategic learners. Students are ultimately expected to integrate and apply the learning skills discussed across their own academic programs and become effective and efficient learners. Students developing these skills should be able to continually draw from the theoretical models they have learned. (Cross-listed as PSYC 1300)

(NOTE: While traditional study skills courses include some of the same learning strategies – e.g., note-taking, reading, test preparation etc. – as learning framework courses, the focus of study skills courses is solely or primarily on skill acquisition. Study skills courses, which are not under-girded by scholarly models of the learning process, are not considered college-level, and, therefore, are distinguishable from Learning Framework courses.)

ENGT (Engineering Technology)

ENGT 1401 Circuits I for Engineering Technology (lecture + lab)

Fundamental concepts of electrical science including potential, current and power in DC circuits. Fundamental laws and relationships applied to the analysis of circuits and networks: capacitance, inductance and magnetism; and single-frequency concepts; use of calculators and computer software in design and analysis of circuits. Standard instrumentation used in test and measurement of DC circuits and systems will be introduced. Prerequisite: MATH 1314, College Algebra or the equivalent. *(This course is included in the Field of Study Curriculum for Engineering Technology.)*

GOVT 2305 Federal Government (*Federal constitution & topics*)

GOVT 2306 Texas Government (*Texas constitution & topics*)

Introduction to the theory and practice of politics and government in America at the national, state, and local levels, with special attention to Texas. Topics include political theory, the American and Texas constitutions, federalism, political participation and elections, the institutions of government, and domestic and foreign policies.

(NOTE: Because Texas Education Code; Subchapter F, Section 51.301 does not specify how the required course content should be distributed over the required six SCH, two instructional patterns, represented by the TCCN course sequences GOVT 2301 & 2302 or GOVT 2305 & 2306, have evolved among institutions. Because combination of a course from one sequence with a course from the other sequence may not successfully fulfill the content requirement of Section 51.301, students are urged to complete all six SCH within a single institution. Inevitably, however, students will seek to combine courses from the two sequences. The following alternative combinations will fulfill the content requirement of Section 51.301: GOVT 2301 and 2305; GOVT 2301 and 2306.)

PSYC (Psychology)

PSYC 1300 Learning Framework

(Also see EDUC 1300)

A study of the 1) research and theory in the psychology of learning, cognition, and motivation, 2) factors that impact learning, and 3) application of learning strategies. Theoretical models of strategic learning, cognition, and motivation serve as the conceptual basis for the introduction of college-level student academic strategies. Students use assessment instruments (e.g., learning inventories) to help them identify their own strengths and weaknesses as strategic learners. Students are ultimately expected to integrate and apply the learning skills discussed across their own academic programs and become effective and efficient learners. Students developing these skills should be able to continually draw from the theoretical models they have learned. *(Cross-listed as EDUC 1300)*

(NOTE: While traditional study skills courses include some of the same learning strategies – e.g., note-taking, reading, test preparation etc. – as learning framework courses, the focus of study skills courses is solely or primarily on skill acquisition. Study skills courses, which are not under-girded by scholarly models of the learning process, are not considered college-level and therefore are distinguishable from Learning Framework courses.)

Field Of Study Transfer Curriculum For Child Development/ Early Childhood Education

Leading to the:
Bachelor of Science in Human Sciences
OR
Bachelor of Science in Interdisciplinary Studies

**Concentration: Child and Family Studies/Child Development including a
Proposed Certification in Early Childhood Education**

36-48 Hour Academic Major-21 hours must be upper-division The lower-division degree requirements must include:	
12 hours of Early Childhood “delivery system: which will include the following: Families and the Community – TECA 1303 Intro. To Early Childhood – TECA 1311 Nutrition, Health & Safety – TECA 1318 Child Growth & Development – TECA 1354 (These courses may be taught in any appropriate department.)	An additional three hours of lower-division course work may be transferred by local agreement from the following topics: Infant and Toddler Child Guidance Early Childhood Creative Arts Children with Special Needs The School Age Child Motor Development

¹Field of Study Curriculum for Grade 4-8 Certification

Leading to the:

¹Bachelor of Science Degree with Major in Mathematics or

¹Bachelor of Science Degree with Major in Science or

¹Bachelor of Science Degree with Major in Mathematics/Science Composite or

¹Bachelor of Science Degree with Major in Social Sciences/Language Arts Composite or

¹Bachelor of Science in Interdisciplinary Studies (Generalist and Bilingual Generalist)

Field of Study: The following 12 semester credit hours (SCH) Field of Study courses must be accepted for transfer with the optional 3 SCH according to local agreement:	
² Schools and Society (3 SCH) - May be one 3 SCH course or three 1 SCH courses designed as recruitment or outreach course - May be cross-listed in several disciplines - Will allow special emphasis for regional needs	An additional 3 SCH of lower-division course work from the following may be transferred by local agreement:
² MATH 1350, Fundamentals of Math I (3 SCH) - With College Algebra prerequisite or equivalent competencies - First of two math courses - Incorporates SBEC proposed math standards - ⁴Will satisfy 6-9 SCH math requirement as per Board policy	Beginning or Intermediate Spanish - Current ³ACGM courses
² MATH 1351, Fundamentals of Math II (3 SCH) - With College Algebra prerequisite or equivalent competencies - Second of two math courses - Incorporates SBEC proposed math standards - ⁴Will satisfy 6-9 SCH math requirement as per Board policy	Physical Science - Current ³ACGM course
Child and Lifespan Development or TECA 1354, Child Growth and Development (3 SCH) - If Child and Lifespan Development, limited to child and adolescent emphasis	Principles of Geography - Current ³ACGM course
	² Children with Special Needs - ³WECM course to be adapted and included in ACGM
	² Principles and Practices of Multicultural Education - ³WECM course to be adapted and included in ACGM

¹ Each baccalaureate degree offered in conjunction with the 4th through 8th grade certification has three required components: General Education (42-48 SCH), an Academic Composite Major (48) SCH, and Pedagogy (18-24 SCH). Elements of the Field of Study curriculum must transfer into one of these three components as determined by the receiving institution.

²The actual course title and course number will be determined by the Lower-Division Academic Course Guide Manual (ACGM) Advisory Committee-math courses completed May 2000.

³Workforce Education Course Manual (WECM) courses are technical in nature: ACGM courses are transferable lower-level, academic courses.

⁴In January 1997, the Coordinating Board adopted a policy requiring all teacher certification programs to include 6-9)

Field of Study Curriculum for Business

The Business Field of Study Curriculum Advisory Committee reviewed the lower-division (freshman and sophomore) requirements of all public four-year colleges and universities in the state of Texas for students seeking a Bachelor of Business Administration (BBA) degree, including all specializations, concentrations, etc. The Committee compiled and compared the findings in an attempt to develop a set of courses that could constitute a Field of Study Curriculum for students seeking the BBA degree; the curriculum would also apply to institutions that award the Bachelor of Arts (BA) or Bachelor of Science (BS) degree with a major in business, including all business specializations. Although some institutions might require a particular course indicative of its mission or region, the committee found that there was substantial commonality among the requirements at different colleges and universities.

Based on that information, the Committee proposes the following annotated set of courses (totaling between 21 and 24 semester credit hours of fully transferable and applicable lower-division courses) to be considered as a Field of Study Curriculum for Business:

Courses

Content Area	Number and type of courses	Texas Common Course Numbering System (TCCNS) Equivalents
Economics	2 courses: Microeconomics & Macroeconomics	ECON 2301 & 2302 only
Mathematics	1 course: Minimum content must be at the level of Calculus or above	MATH 1325 ¹
Computer Literacy	1 course: New course, with a TCCNS BCIS prefix to be assigned ²	BCIS 13XX or 14XX only
Speech	1 course: Public speaking with an emphasis (50% or more of course content) on the preparation and presentation of professional speeches, using computer technology when appropriate	SPCH 1311 (with appropriate content only), or SPCH 1315, or SPCH 1321 (preferred) only
Accounting	2 courses: Financial & Managerial Accounting	ACCT 2301 or 2401 & 2302 or 2402 only

¹Individual institutions should determine any prerequisite requirements for MATH 1325.

²This course is a computer-literacy-based course with business applications, for which a description and desirable student outcomes have been developed by the advisory committee. The description of the course was approved for inclusion in the newly revised Lower-Division Academic Course Guide Manual on March 3, 2000.

The following Notes are also part of the field of study curriculum. They address special circumstances.

NOTES:

First, wherever possible, courses applied to fulfill the field of study curriculum requirement should also be used to satisfy requirements in the general academic core curriculum. Generally, the math course, the speech course and the first economics course *may* be able to fulfill requirements in both curricula.

Second, up to a total of six additional semester credit hours of business-related lower-division course work may be transferred by local agreement between institutions, OR required by the receiving institution as long as the additional credit does not duplicate any other requirement within the field of study curriculum.

Third, special circumstances dictate the following supplements to the field of study curriculum:

- Degree programs in Information Systems, Computer Information Systems, and Management Information Systems may require additional courses and/or demonstrated proficiency in computer programming;
- International Business and other business programs with a specific international focus may require additional courses and/or demonstrated proficiency in foreign language; and
- Joint degree programs in which the degree awarded is a business degree, but the program is jointly offered by a business and a non-business discipline (such as a BBA in Actuarial Science offered jointly by a College of Business and a Department of Mathematics and Statistics) may include some or all of any field of study curricular components of the non-business discipline. If no field of study exists for the non-business discipline, the lower-division courses that are normally required of majors in the non-business discipline should be completed as part of lower-division preparation for upper-division work.

Notes:

1. COSC 1336/1436 and 1337/1437 are preparatory and sequential in nature; however, not all courses are required for the Computer Science major at all universities, but may apply to general degree requirements.
 - a) COSC 1336/1436 is not part of the Computer Science major requirements at The University of Texas at Austin, University of Texas at Arlington, University of Texas at Dallas, and Texas A & M University.
 - b) COSC 1337/1437 is not part of the Computer Science major requirements at The University of Texas at Austin. Preparatory courses such as COSC 1336/1436 and COSC 1337/1437 will assist students that need additional background but do not apply toward the computer science major requirements.
2. COSC 2325/2425 is not part of the Computer Science major requirements at the University of Texas at Austin or Texas A&M University, but may be applied to general degree requirements.
3. It is recommended that students complete the math sequence, physics sequence, and computer science sequence at the same institution to reduce the likelihood of potential gaps in the curriculum.

Field of Study Curriculum for Criminal Justice

The Criminal Justice Field of Study Curriculum Advisory Committee reviewed the lower-division (freshman and sophomore) requirements of all public four-year colleges and universities in the state of Texas for students seeking a Bachelor of Arts (BA) or Bachelor of Science (BS) degree with a major in criminal justice, including all specializations, concentrations, etc. The Committee compiled and compared the findings in an attempt to develop a set of courses that could constitute a Field of Study Curriculum for Criminal Justice; the curriculum would apply to institutions that award the BA or BS degree with a major in criminal justice, including all criminal justice specializations.

Based on that information, the Committee recommends the following set of courses (totaling 15 semester credit hours (SCH) of fully transferable and applicable lower-division courses) and up to an additional 6 “discretionary” SCH to be considered as a Field of Study Curriculum for Criminal Justice. Staff concurs with that recommendation.

Courses

TCCNS*	SCH	COURSE TITLE
CRIJ 1301	3	Introduction to Criminal Justice
CRIJ 1306	3	Court Systems & Practices
CRIJ 1310	3	Fundamentals of Criminal Law
CRIJ 2313	3	Correctional Systems & Practices
CRIJ 2328	3	Police Systems & Practices

*Texas Common Course Numbering System

NOTE: Up to a total of 6 additional semester credit hours of criminal justice-related lower-division course work may be transferred by local agreement **OR** required by the receiving institution, as long as the additional credit does not duplicate any other requirement within the field of study curriculum. Standards of instruction accepted for courses in the *Lower-Division Academic Course Guide Manual (ACGM)* will apply unless course-equivalent status has been developed by local agreement.

Field of Study Curriculum for Engineering

Engineering is a very broad field that covers many disciplines; consequently, there is significant variance in engineering curricula among our state institutions. Even within an engineering specialty like chemical or electrical engineering there are differences that reflect varied areas of focus or innovations from one institution to the next. Nevertheless, the field of study curriculum for engineering is designed to promote maximum transferability for students while still preserving appropriate curricular diversity for institutions. As indicated in the following table, some field of study courses apply to any undergraduate engineering program, while other courses apply when the engineering program at the receiving institution requires such courses.

Therefore, there are no discrete field of study courses for specific specialties of engineering (chemical, civil, electrical, mechanical, etc.) Rather, a course is considered part of the field of study curriculum for an engineering program if:

- 1) it is listed in the table as applying to “all programs;”
- or**
- 2) it is listed as applying to “only those programs requiring the course” **and** is required by the program at the receiving institution.*

If a course is not listed as a field of study course, then (as is the usual practice), a student can still transfer the course if there is a local agreement between the sending and receiving institutions.

The content areas of the field of study courses are from two areas of mathematics, two areas of science, and two areas of engineering. For a number of students, credits in some of these math and science courses would also satisfy components of the core curriculum. Note that additional matrices that follow the field of study table specify in more detail how certain configurations of coursework transfer.

Courses contained in the field of study curriculum for engineering (as defined by this document) will transfer freely among Texas public institutions of higher education. Receiving institutions may, however, require transfer students to successfully complete courses that are not part of this field of study curriculum if completion of those courses is required of all students in order to receive a baccalaureate degree in engineering. In addition, the receiving institution can specify minimum acceptable grades for courses accepted in transfer.

*For example, a student at Community College X completed a General Chemistry II (Chem II) course and wishes to transfer to a mechanical engineering program at a university. General Chemistry II is designated in the Field of Study as “only those programs requiring Chem II.” Therefore, if the mechanical engineering program at University A requires Chem II, then this

institution would have to accept the course in transfer. But if the mechanical engineering program at University B does not require Chem II, then this institution would not be obligated to accept the course in transfer as part of the major.

Further, if the mechanical engineering program at University A at some point eliminates the General Chemistry II requirement, then the institution must accept Chem II in transfer as part of the major only if the student completed the course when the Chem II requirement (indicated in the university's catalog for that year) was still in effect. If the mechanical engineering program at University B at some point adds General Chemistry II as a requirement, the institution must then start accepting Chem II in transfer to be applied to the major.

¹ A student completing coursework totaling less than the minimum SCH requirements for calculus and physics lecture will obtain transfer credit at the receiving institution for each course successfully completed at the sending institution.

The following three matrices show how specified courses and combination of these courses would transfer from the sending to the receiving institution for field of study engineering courses.

= transfers; x = does not transfer; other is explained by text.

Matrix 1. Differential Equations and Linear Algebra

Receiving Institution

Sending Institution	Course	Differential Equations	Linear Algebra	Differential Equations and Linear Algebra (combined)
	Differential Equations		x	The Differential Equations course and the Linear Algebra course <u>together</u> transfer as the combined course
	Linear Algebra	x		
	Diff. Eq. and Linear Alg. (combined)	Decided by receiving institution	Decided by receiving institution	

Note: The transferable courses in this table are considered part of the field of study curriculum if the program of the receiving institution requires them.

The interpretation of this matrix is as follows:

- A student who has taken only Differential Equations (DE) would receive credit for DE (if it was required by the receiving institution) but would not receive credit for Linear Algebra (LA) or the combined DE/LA course.

Lower-Division Academic Course Guide Manual (Revised 2003)

- Similarly, a student who has taken only LA would receive credit for LA (if it was required by the receiving institution) but would not receive credit for DE or the combined DE/LA course.
- A student who has taken both DE and LA would get credit for both DE and LA (if both courses were required by the receiving institution) or the student would receive credit for the combined DE/LA course (if it was required). In the latter case, a student would receive the number of credits in the combined course. For example, if a student has taken a 3 SCH DE course and a 3 SCH LA course and transfers to a university that offers and requires only a 3 SCH DE/LA course, then that student would receive transfer credit of 3 SCH for the combined DE/LA course.
- A student who has taken the combined DE/LA course would get credit for the combined course (if it were required by the receiving institution). However, if the receiving institution required either the separate DE course or the LA course or both, then the receiving institution could decide whether to award any credit for the student's combined DE/LA course.

Matrix 2. University Physics

		Receiving Institution		
Sending Institution	Course	Physics – lecture only (3 SCH)	Physics – lab only (1 SCH)	Physics – lecture and lab combined (4 SCH)
	Physics lecture		x	The lecture course and the lab course <u>together</u> transfer as the combined lecture and lab course
	Physics lab	x		
	Physics lect. and lab (combined)	Transfers as the lecture only or as both the lecture course and the lab course		

Note: The lecture component is a required field of study course. The lab component is a field of study course if the program of the receiving institution requires it.

Matrix 3. Engineering Mechanics—Statics and Dynamics

		Receiving Institution		
Sending Institution	Course	Statics	Dynamics	Statics and Dynamics (combined)
	Statics		x	The Statics course and the Dynamics course <u>together</u> transfer as the combined course
	Dynamics	x		
	Statics and Dynamics (combined)	Decided by receiving institution	Decided by receiving institution	

Note: The transferable courses in this table are considered part of the field of study curriculum if the program of the receiving institution requires them.

Field of Study Curricula for Engineering Technology

Bachelor of Science degree with a major in:

- Civil Engineering Technology
- Computer Engineering Technology
- Construction Engineering Technology
- Electrical Engineering Technology
- Electronics Engineering Technology
- Manufacturing Engineering Technology
- Mechanical Engineering Technology

Civil Engineering Technology Track

There are three universities in Texas that offer Civil Engineering Technology degrees. All institutions have the same Math requirements, but Physics requirements vary across these three institutions. Review of the Physics requirements in these programs suggest two sub-tracks: (1) Calculus and Algebra-based Physics and (2) Calculus and Calculus-based Physics. Therefore, this field of study curriculum will offer two sub-tracks to accommodate all institutional requirements.

Computer Engineering Technology Track

There are three universities in Texas that offer Computer Engineering Technology degrees; Math and Physics requirements are the same across these three institutions. Reviews of the Math and Physics requirements in these programs suggest one track: Calculus and Algebra-based Physics. Therefore, this field of study curriculum offers a single track to accommodate all institutional requirements.

Construction Engineering Technology Track

There are seven universities in Texas that offer Construction Engineering Technology degrees; Math and Physics requirements vary across these seven institutions. Review of the Math and Physics requirements in these programs suggest three sub-tracks: (1) Algebra and Algebra-based Physics, (2) Calculus and Algebra-based Physics, and (3) Calculus and Calculus-based Physics. Therefore, this field of study curriculum offers three sub-tracks to accommodate all institutional requirements.

Electrical Engineering Technology Track

There are two universities in Texas that offer Electrical Engineering Technology degrees. Review of the Math and Physics requirements in these programs suggest one sub-track: Calculus and Algebra-based Physics. Therefore, this field of study curriculum offers a single sub-track to accommodate all institutional requirements.

Electronics Engineering Technology Track

There are seven universities in Texas that offer Electronics Engineering Technology degrees. Math and Physics requirements vary across these seven institutions. Review of the Math and Physics requirements in these programs suggest three sub-tracks: (1) Algebra and Algebra-

based Physics, (2) Calculus and Algebra-based Physics, and (3) Calculus and Calculus-based Physics. Therefore, this field of study curriculum offers three sub-tracks to accommodate all institutional requirements.

Manufacturing Engineering Technology Track

There are thirteen universities in Texas that offer Manufacturing Engineering Technology degrees. The Math and Physics requirements vary across these thirteen institutions. A review of the Math and Physics requirements in these programs suggest three sub-tracks: (1) Algebra and Algebra-based Physics, (2) Calculus and Algebra-based Physics, and (3) Calculus and Calculus-based Physics. Therefore, this field of study curriculum offers three sub-tracks to accommodate all institutional requirements.

Mechanical Engineering Technology Track

There are seven universities in Texas that offer Mechanical Engineering Technology degrees; Math and Physics requirements vary across these institutions. Review of the Math and Physics requirements in these programs suggest two sub-tracks: (1) Calculus and Algebra-based Physics, and (2) Calculus and Calculus-based Physics. Therefore, this field of study curriculum offers two sub-tracks to accommodate all institutional requirements.

Notes:

1. The following abbreviations were used for Texas public four-year universities:

LAMAR	Lamar University
MSU	Midwestern State University
PVAMU	Prairie View A&M University
SHSU	Sam Houston State University
SRSU	Sul Ross State University
SWTSU	Southwest Texas State University
TAMU	Texas A&M University
TAMUC	Texas A&M University-Commerce
TAMU-CC	Texas A&M University-Corpus Christi
TASU	Tarleton State University
TSU	Texas Southern University
TTU	Texas Tech University
UH	University of Houston
UH-D	University of Houston-Downtown
UNT	University of North Texas
UT-B	The University of Texas at Brownsville
UT-T	The University of Texas at Tyler
WTAMU	West Texas A&M University

2. Mathematics Requirement —As mentioned above, there is considerable variation across all of the institutions of higher education in Texas and across the seven Engineering Technology majors about which level of mathematics is required (i.e., algebra and trigonometry or precalculus, or calculus). Because of this variation, the Committee and the staff recommend that students be advised that the specific major and

institution they select for transfer will determine the appropriate mathematics requirement.

3. **Physics Requirement** —Although all tracks and institutions require a lab-based physics course, some require a calculus-based physics course while others require an algebra-based physics course. The reference to algebra-based physics refers to a course that includes knowledge of trigonometry and/or precalculus. Students are advised to determine the requirements of the particular institution and Engineering Technology major they will pursue to determine the appropriate physics requirement.
4. For students wanting to obtain bachelor's degrees in a particular major from a particular institution, advisors and students should be fully informed about differences among sub-tracks.
5. If an institution has decided that course(s) taken by a student at another institution from a particular field of study curriculum are not required to obtain a degree in Engineering Technology, those course(s) may nevertheless transfer as electives. Further, all course(s) listed on the field of study curriculum do not have to be offered by all institutions, but the institutions must honor courses which are part of the field of study curriculum. Appropriate Southern Association of Colleges and Schools (SACS) criteria must be met before any course(s) can be offered.
6. If a student pursues a non-calculus-based course of study and transfers to a calculus-based baccalaureate program, that program may require the student to take additional work in calculus as needed.
7. Receiving institutions may require transfer students to successfully complete courses that are not a part of this field of study curriculum if completion of those courses is required of all students in order to receive a baccalaureate degree in Engineering Technology. An institution may require additional lower-division courses when the field of study curricula does not specify content required for a degree program. However, the additional courses must not duplicate content already addressed within the field of study curricula.

Field of Study Curriculum for Music

The field of study curriculum for music is designed to apply to the Bachelor of Music degree but may also be applied to the Bachelor of Arts or other baccalaureate-level music degrees as deemed appropriate by the awarding institution. The field of study curriculum is furthermore intended to serve as a guide for community and technical colleges in structuring a transfer curriculum in music.

Field of Study Courses

The field of study curriculum shall consist of 27 to 35 lower division semester credit hours that are fully transferable. Transfer of credit in ensemble, applied study, and theory/aural skills shall be on a course-for-course basis.

Course	Number Of Semesters	Semester Credit Hours
Ensemble	4	4
Applied Study	4	8
Theory/Aural Skills	4	12-16
Music Literature	1	3

Keyboard (piano) Competency

Because keyboard (piano) competency is a requirement for most baccalaureate degrees in music, up to four additional semester credit hours of course work pertaining to keyboard (piano) *may* transfer by agreement between institutions. Keyboard competency courses approved for transfer are courses in group piano or applied lessons that concentrate specifically on skills development for passing keyboard proficiency examinations. Keyboard courses that concentrate primarily on performance literature are not considered to be keyboard competency courses for the purposes of this field of study. *Completion of courses leading to keyboard proficiency does not necessarily satisfy the established proficiency requirement at a receiving institution.*

Competency, Proficiency, and Diagnostic Assessment

Transferring students who have completed the field of study curriculum must satisfy the competency and proficiency requirements of the receiving institution. Transferring students shall not be required to repeat courses transferred as part of the field of study curriculum. However, diagnostic assessment of transfer students is permissible if the receiving institution routinely conducts diagnostic assessment of native students at the same point in the program of study.

Vocal Diction and Instrumental Methods

Course work in vocal diction and instrumental methods is not included in the field of-study curriculum but may nonetheless transfer by agreement between institutions.

Courses for Specific Degree Programs

Completion of the field of study curriculum shall not prevent a receiving institution from requiring additional lower division courses that may be necessary for specific degree programs. Courses selected for inclusion in the field of study curriculum are those considered to be common to lower division study for most music degrees. Receiving institutions may require transfer students in specialized programs (e.g., jazz studies, performance, composition, music therapy, etc.) to take additional degree-specific lower-division courses that are *not* included in the field of study curriculum.

Music Literature Course(s)

The music field of study curriculum contains one semester of music literature that will automatically transfer into the student's degree program at a receiving institution. Since some senior colleges and universities require students to successfully complete two semesters of music literature, sending institutions should, to the extent possible, work with receiving institutions to develop transfer options that best serve student needs while maintaining program integrity at the sending and receiving institutions. A second semester of music literature is automatically transferable when it is part of a sending institution's approved general education component. Two-year colleges that offer a single course in music literature may elect to strengthen that course by increasing the weekly contact hours to five as permitted in the *ACGM*.

Full Academic Credit

Academic credit shall be granted on a course-for-course basis in the transfer of theory/aural skills, applied music, and ensemble courses and will be accepted at the credit-hour level of the receiving institution. Full academic credit shall be granted on the basis of comparable courses completed, not on specific numbers of credit hours accrued.

General Education Courses

In addition to the course work listed above, the maximum recommended transfer credit from the general education core curriculum is 31-39 semester credit hours. Students shall complete the general education core curriculum in effect at the institution that will grant the baccalaureate degree.

The Associate's Degree in Music

The field of study curriculum should serve as the basis for structuring the associate's degree in music. Each two-year college should determine which courses from its approved general education core curriculum to include with the music field of study curriculum in order to constitute a 66 semester credit hour transfer block. In order to receive the baccalaureate degree, a transferring student shall complete the general education core at the receiving institution.

Field of Study Curriculum for Nursing

The following annotated set of courses, totaling 28 semester credit hours (SCH) of fully transferable and applicable lower-division academic courses, and an additional set of Workforce Education (WECM) nursing courses, make up the Field of Study Curriculum for Nursing:

Academic Courses

Content Area	Number and type of courses	Texas Common Course Numbering System Equivalents
Anatomy & Physiology	2 courses: A&P I with lab and A&P II with lab	BIOL 2401 and BIOL 2402 only ¹
Microbiology	1 course: Microbiology with lab	BIOL 2420 OR BIOL 2421
Chemistry	1 course: chemistry with lab	Any 4 SCH ACGM course including lab
Nutrition	1 course: Nutrition & Diet Therapy I	HECO 1322 OR BIOL 1322
Psychology	2 courses: General Psychology and Lifespan Growth & Development	PSYC 2301 AND PSYC 2314
Mathematics	1 course: Elementary Statistical Methods	MATH 1342

Prerequisite courses to BIOL 2401/2402 or the equivalent are not required for the Field of Study Curriculum for Nursing

Nursing Content Courses

NOTE: Lower-division nursing content is offered at community colleges through one of two general types of programs: Blocked or Integrated. Because of the distribution of content, it is extremely difficult to align curricula from one type of program to another. Students who desire to transfer from a program utilizing one type of program into the other type of program should be prepared to make up some content through a “bridge” course or through the repetition of some content within courses. It is recommended that a student make every effort to avoid transferring from one type of program to the other before completing the associate degree in nursing in order not to lose credit.

Lower-division nursing content courses being transferred from a blocked-curriculum program to another blocked-curriculum program should be applied to the degree on a **course-for-course** substitution basis, in which the course transferred is applied IN LIEU OF the course at the

receiving institution, even if the number of semester credit hours awarded upon the completion of the course varies between the sending and receiving institutions. The same procedure should be used when a student transfers from an integrated-curriculum program into another integrated-curriculum program.

For Nursing Content Courses, CHOOSE EITHER Blocked Curriculum OR Integrated Curriculum BUT NOT BOTH:

The following notes address special circumstances and are also part of the field of study curriculum:

- (1) Wherever possible, courses applied to fulfill field of study curriculum requirements should also be used to satisfy requirements in the general academic core curriculum. Generally, the math course, the biology or chemistry course(s), and one psychology course should be able to fulfill requirements in both curricula.
- (2) Courses selected for inclusion in the field of study curriculum are those that are common to most baccalaureate nursing programs.
- (3) Completion of the field of study curriculum shall not prevent a receiving institution from requiring additional courses/content for specific degree programs.
- (4) Students should not be required to repeat courses that they have completed successfully.
- (5) The academic courses and the unmodified WECM courses that are included in the Field of Study Curriculum for Nursing should transfer immediately upon approval of the field of study curriculum by the Coordinating Board. New WECM courses and courses that need modification should be accepted in transfer as soon as those modifications have been approved by the WECM Maintenance committee and added to the WECM inventory. Implementation of the complete field of study curriculum should not take more than one calendar year following addition of the new and modified courses to the WECM inventory. New or modified WECM courses will be initiated with entering students. Programs may allow sophomore students to continue with the previous curricula to prevent changing courses in the middle of their programs. Full implementation of new and modified WECM courses must be complete within two years after their addition to the WECM inventory.

Instructions For Requesting A Unique Need Course

General Academic Course Inventory Update

The proposed course does not conform closely enough to one of the courses described in the List of Approved Courses for Public Community and Junior Colleges. The college may request Unique Need approval from the Director of Instructional Programs.

Item #1 Name the institution (and campus, if applicable)

Item #2 Name the official completing this form

Item #3 Indicate the academic year and semester the course(s) would first be offered.

Item #4 Indicate the complete Course Title as it would appear in the institution's catalog.

Item #5 Indicate the complete Course Description as it would appear in the institution's catalog. Indicate the catalog date and page number where this course will appear.

Item #6 Unique courses must meet the criteria identified in Coordinating Board Rule 5.172. Appropriate items should be checked and documentation attached. Justification of need should include information about special student and/or community needs, degree or field to which course would apply, purpose of course, special qualifications of faculty, etc. If the unique course is approved, it will be assigned an approval number for one academic year only and for the requesting college only.

Item #7 Course Data

- a. Update Code: Enter A if the course is a new course to be added. D if the course is to be deleted, or C if this is a change in an existing course.
- b. FICE Code: Enter the FICE Code for the institution
- c. Approval Number: If a number has been previously assigned for the course, enter it. If it is an excessive hour request, enter the number of the equivalent course after substituting an '8' in the 7th digit position. Otherwise, leave blank and the number will be assigned by Coordinating Board staff.
- d. Subject Prefix: Enter the subject abbreviation for each course as established and used on official transcripts by the institution.
- e. Course Number: Enter the course identification number as used by the institution.
- f. Semester Credit Hour Value: Enter the maximum number of semester credit hours which may be awarded for each course (e.g. if ART NNNN may be taken for 1, 2, 3, or 4 SCH, enter 4).
- g. Course Short Title: Enter the title of each course as established and used on official transcripts by the institution.
- h. Contact Hours:

LECTURE: Enter the number of hours per semester in a standard 16 week semester instructors are assigned to be "in contact" (i.e., a structured teaching situation) with students in a lecture situation (e.g., classroom, conference, seminar, individual instruction, independent student). Enter only whole numbers in the space provided.

LAB: Enter the number of hours per semester instructors are required to spend "in contact" (i.e., a structured teaching situation) with students in a laboratory situation associated with the course. Enter only whole numbers in the space provided.

- i. Total Contact Hours: Enter the total number of hours in a standard 16 week semester instructors are assigned to be in contact with students in a lecture and laboratory situation. Enter only whole numbers in the space provided.

TEXAS HIGHER EDUCATION COORDINATING BOARD

Distance Learning Standards

- The signature below certifies that this institution has met all applicable requirements of Coordinating Board rules (Section 5.153) for Distance Learning resident credit courses to be offered during academic year. This certification indicates specifically that:
- No degree or certificate program will be offered via distance learning instruction without prior approval of the Board. In addition, this institution will not offer through distance learning instruction at any site an array of courses that would constitute a degree or certificate program without prior approval by the Board.
- Distance learning instruction offered by any live or telecommunications delivery system will be comparable to on-campus instruction. It will meet the same quality standards offered on-campus to regularly enrolled students.
- A distance learning course which offers either regular college credit or Continuing Education Units will meet the standards of the Commission on Colleges of the Southern Association of Colleges and Schools.
- Students enrolled in distance learning will satisfy the same requirements for admission to the institution, the program of which the course is a part, and to the class/section itself, as are required of on-campus students.
- Faculty providing distance learning instruction will be selected and evaluated by the same standards, review, and approval procedures used by the institution to select and evaluate faculty responsible for on-campus instruction. Institution will provide training and support to enhance the added skills required of faculty to teach classes via instructional telecommunications.
- The instructor of record will participate in the delivery of instruction and evaluation of student progress.
- Providers of graduate-level distance learning instruction will be approved by the graduate faculty of the institution.
- All distance learning instruction will be administered under the authority of the same office or person administering the corresponding on-campus instruction. The supervision, monitoring, and evaluation processes for instructors must be comparable to those for on-campus instruction.
- Students will be provided academic support services, including academic advising, counseling, library and other learning resources, tutoring services, and financial aid, that are comparable to those available for on-campus students.
- Facilities for distance learning instruction (other than homes as instructional telecommunications reception sites) will be adequate for the purpose of delivering instruction which is comparable in quality to on-campus instruction.
- No master's degree program will be offered via distance learning instruction without express prior notification to the Southern Association of Colleges and Schools. No distance learning doctoral degree program will be authorized except through the approval of joint or cooperative degree programs.

Appendix C: Distance Education and Off-Campus Instruction

TEXAS ADMINISTRATIVE CODE

TITLE 19 EDUCATION

PART 1 TEXAS HIGHER EDUCATION COORDINATING
BOARD

CHAPTER 4 RULES APPLYING TO ALL PUBLIC INSTITUTIONS
OF HIGHER EDUCATION IN TEXAS

SUBCHAPTER E APPROVAL OF DISTANCE EDUCATION AND OFF-
CAMPUS INSTRUCTION FOR PUBLIC COLLEGES
AND UNIVERSITIES

RULE §4.101 **Purpose**

This subchapter provides guidance to all public institutions of higher education in Texas regarding the delivery of distance education and off-campus courses and programs. The Board's goals are to ensure the quality of Texas-based distance education and off-campus courses and programs and to provide residents with access to distance education and off-campus courses and programs that meet their needs. The rules are designed to assure the adequacy of the technical and managerial infrastructures necessary to support those courses and programs.

RULE §4.102 **Authority**

The authority for this subchapter is Texas Education Code, §61.051(j).

RULE §4.103 **Definitions**

The following words and terms, when used in this subchapter, shall have the following meanings, unless the context clearly indicates otherwise:

(1) Board--The Texas Higher Education Coordinating Board.

(2) Commissioner--The Commissioner of Higher Education.

(3) Distance education--Instruction in which the majority of the instruction occurs when the student and instructor are not in the same physical setting. A class is considered a distance education class if students receive more than one-half of the instruction at a distance. Distance education can be delivered synchronously or asynchronously to any single or multiple location(s):

(A) Other than the "main campus" of a senior institution (or "on campus"), where the primary office of the chief executive officer of the campus is located;

(B) Outside the boundaries of the taxing authority of a public community/junior college district; or

(C) Via instructional telecommunications to any other distant location, including electronic delivery of all types.

(4) Institutional Plan--A long-term plan describing how an institution seeking authority to offer distance education and off-campus instruction will ensure quality and resources in providing such instruction, based on Board-adopted Guidelines for Institutional Plans.

(5) Instructional Telecommunications--Electronic telecommunication technology systems employed to deliver distance education instruction.

(6) Off-Campus--Instruction in which one-half or more of the instruction is delivered with the instructor and student in the same physical location and which meets one of the following criteria: for senior institutions, Lamar state colleges, or public technical colleges, off-campus locations are locations away from the main campus; for public community/junior colleges, off-campus locations are locations outside the taxing district.

(7) Program--Any certificate or degree program offered by a public institution of higher education.

(8) Regional Council--A cooperative arrangement among representatives of all public and independent higher education institutions within a Uniform State Service Region.

(9) Senior institution--Public universities, health science centers and health-related institutions. All provisions of this subchapter relating to universities or to "senior

RULE §4.104**General Provisions**

(a) This subchapter governs the following types of instruction:

(1) Academic credit instruction and formula-funded workforce continuing education provided by a public community/junior college outside of the boundaries of its taxing district;

(2) Academic credit instruction provided by a public technical college, Lamar state college, university, or health-related institution at a site other than the main campus where the primary office of the chief executive officer of the campus is located; or

(3) Academic credit instruction provided at out-of-state or foreign locations by public institutions of higher education;

(b) This subchapter does not apply to the following types of instruction:

(1) Non-credit adult and continuing education courses provided at a distance by universities and health science centers;

(2) Continuing education, except formula-funded workforce continuing education, provided by public community/junior colleges, Lamar state colleges, and public technical colleges; or

(3) Correspondence and extension classes that are not submitted for formula funding.

(c) The Board retains final authority for the offering of all classes, courses, programs, and degrees, and may take whatever action it deems appropriate to comply with the law or to maintain a high-quality and cost-effective system of distance education and off-campus instruction for the state.

(1) Each course and program offered under the provisions of this subchapter must be within the role and mission of the institution responsible for offering the instruction. Each course must be on the offering institution's inventory of approved courses, and each program must be on the offering institution's inventory of approved programs.

(2) Prior approval may be required before an institution may offer courses and programs under the provisions of this subchapter in certain subject area disciplines or under other conditions specified by the Board.

(3) No doctoral or special professional degree programs may be offered via distance education or off-campus instruction without specific prior approval by the Board. The Commissioner may approve for delivery to other off-campus sites or via other delivery modes doctoral or special professional degree programs that have previously been approved by the Board for electronic or off-campus delivery.

RULE §4.105

**Standards and Criteria for Distance Education and
Off-Campus Instruction**

The following standards and criteria shall apply to distance education and off-campus instruction.

- (1) Instruction shall meet the quality standards applicable to on-campus instruction.
 - (2) Courses which offer either semester credit hours or Continuing Education Units shall do so in accordance with the standards of the Commission on Colleges of the Southern Association of Colleges and Schools.
 - (3) Students shall satisfy the same requirements for admission to the institution, to the program of which the course is a part, and to the class/section itself, as are required of on-campus students. Students in programs to be offered collaboratively must meet the admission standards of their home institutions.
 - (4) Faculty shall be selected and evaluated by the same standards, review, and approval procedures used by the institution to select and evaluate faculty responsible for on-campus instruction.
 - (5) Institutions shall provide training and support to enhance the added skills required of faculty teaching classes via instructional telecommunications.
 - (6) The instructor of record shall bear responsibility for the delivery of instruction and for evaluation student progress.
 - (7) Providers of graduate-level instruction shall be approved in the same manner as graduate faculty for on-campus instruction.
 - (8) All instruction shall be administered by the same entity administering the corresponding on-campus instruction. The supervision, monitoring, and evaluation processes for instructors shall be comparable to those for on-campus instruction.
 - (9) Students shall be provided academic support services - including academic advising, counseling, library and other learning resources, and financial aid - appropriate for distance education and off-campus learners.
 - (10) Facilities (other than homes as distance education reception sites) shall be comparable in quality to those for on-campus instruction.
 - (11) Institutions shall adhere to additional criteria outlined in the Guidelines for Institutional Plans for Distance Education and Off-Campus Instruction.
-

(a) Prior to offering any distance education or off-campus courses or programs for the first time, a public community/junior or Lamar state college, technical college, or senior institution shall submit an Institutional Plan for Distance Education and Off-Campus Instruction to the Board for approval. The Commissioner shall provide guidelines for development of such plans.

(b) Institutional academic and administrative policies shall reflect a commitment to maintain the quality of distance education and off-campus programs in accordance with the provisions of this subchapter. An Institutional Plan shall conform to Board guidelines and criteria of the Commission on Colleges of the Southern Association of Colleges and Schools in effect at the time of the Plan's approval. These criteria shall include provisions relating to:

- (1) Institutional Issues;
- (2) Educational Programs;
- (3) Faculty;
- (4) Student Support Services; and
- (5) Distance Education Facilities and Support.

(c) Prior to Board consideration of an Institutional Plan, the Commissioner may approve an offering by an institution of a limited number of distance education courses for experimental purposes.

(d) Each institution with an approved Institutional Plan for Distance Education and Off-Campus Instruction shall submit an updated Plan on a schedule to be determined by the Commissioner. Thereafter, Institutional Plans shall be reviewed periodically on a schedule to be determined by the Commissioner.

RULE §4.107

**Distance Education and Off-Campus Course and
Program General Provisions**

(a) The Commissioner shall develop procedures governing the review and approval of distance education and off-campus courses and programs.

(b) Regional Councils in each of the ten Uniform State Service Regions are hereby authorized to make recommendations to the Commissioner and to resolve disputes regarding plans for lower-division courses and programs proposed by public institutions.

(1) The presidents, or designated representatives, of each public and independent institution of higher education with its main campus in each Region comprise the Council membership.

(2) The Commissioner shall develop procedures to govern Regional Council responsibilities.

RULE §4.108

**Out-of-State and Foreign Course and Program
General Provisions**

(a) State-funded out-of-state and foreign off-campus courses offered by Texas public institutions of higher education, or by an approved consortium composed of Texas public institutions, shall be approved by the Commissioner in order for the semester credit hours or contact hours generated in those courses to be used for formula reimbursement and shall adhere to procedures and standards developed by the Commissioner for out-of-state and foreign offerings.

(b) Non-state-funded credit courses shall not be included in submissions to Regional Councils. Non-credit adult and continuing education courses offered at a distance by universities and health science centers are exempt from this subchapter.

(c) Institutions may not submit for formula funding distance education courses delivered outside the state without specific prior approval by the Commissioner.

Appendix D: Rules for Academic Associate Degrees

TEXAS ADMINISTRATIVE CODE

TITLE 19 EDUCATION

PART 1 TEXAS HIGHER EDUCATION COORDINATING BOARD

CHAPTER 9 PROGRAM DEVELOPMENT IN PUBLIC
COMMUNITY/JUNIOR COLLEGE DISTRICTS AND
TECHNICAL COLLEGES

SUBCHAPTER J ACADEMIC ASSOCIATE DEGREE PROGRAMS

RULE §9.181 **Purpose**

This subchapter provides rules for the structure of academic associate degree programs in public community/junior and technical colleges eligible for state appropriations.

RULE §9.182 **Authority**

The Texas Education Code, Section 61.003, 61.051(e)(f), 61.0513, 61.053, 61.054, 61.055, 61.061, 61.062(c)-(d), 61.075, 130.001(b)(3)-(4), 130.003(e)(1)(2)(3) and (7) and 135.04, authorize the Coordinating Board to adopt policies, enact regulations, and establish rules for the coordination of postsecondary certificate and associate degree programs eligible for state appropriations.

RULE §9.183 **Degree Titles, Program Length, and Program Content**

(A) An academic associate degree may be called either an associate of arts (AA) or an associate of science (AS) degree.

(1) The associate of arts (AA) is the default title for an academic associate degree program if the college offers only one type of academic degree program.

(2) If a college offers both associate of arts (AA) and associate of science (AS) degrees, the degree programs may be differentiated in one of two ways, including:

(a) The AA program may have additional requirements in the liberal arts and/or the AS program may have additional requirements in disciplines such as science, mathematics, or computer science; or

(b) The AA program may serve as a foundation for the BA degree and the AS program for the BS degree.

(B) Academic associate degree programs must consist of a minimum of 60 SCH and a maximum of 66 SCH.

(C) Except as provided in paragraph (1) of this subsection, academic associate degree programs must incorporate the institution's approved core curriculum as prescribed by Section 4.28 of this title (relating to core curriculum and Sections 4.29 of this title (relating to core curricula larger than 42 semester credit hours).

(1) A college may offer a specialized academic associate degree that incorporates a Board-approved field of study curriculum as prescribed by Section 4.32 of this title (relating to field of study curricula) and a portion of the college's approved core curriculum if the coursework for both would total more than 66 SCH.

(2) A college that has a signed articulation agreement with a General Academic Teaching Institution to transfer a specified curriculum may offer a specialized associate degree program that incorporates that curriculum.

RULE §9.184**Approval**

Community colleges and state colleges authorized to offer transfer programs may offer academic associate degree programs that conform to these guidelines without requesting approval from the Board.

RULE §9.185**Reporting to the Board**

(a) Contact hours for courses in approved academic certificate and associate degree programs at public postsecondary institutions must be determined and reported in compliance with Board policy as outlined in the *Lower-Division Academic Course Guide Manual* and state law.

RULE §9.186

Disapproval of Programs; Noncompliance

No funds appropriated to any public postsecondary institution shall be expended for any academic associate degree program that is not in compliance with these rules. Existing academic degree programs must be brought into compliance by August 1, 2004.

Texas Administrative Code

TITLE 19 EDUCATION

PART 1 TEXAS HIGHER EDUCATION COORDINATING BOARD

CHAPTER 4 RULES APPLYING TO ALL PUBLIC INSTITUTIONS OF
HIGHER EDUCATION IN TEXAS

SUBCHAPTER B TRANSFER OF CREDIT, CORE CURRICULUM AND
FIELD OF STUDY CURRICULA

RULE §4.21 **Purpose**

The purpose of this subchapter is to provide for the development and implementation of policies that encourage the free and appropriate transferability of lower division course credit among institutions of higher education, and especially to provide for the smooth transfer of lower division credit through core curricula, field of study curricula, and a procedure for the resolution of transfer disputes.

RULE §4.22 **Authority**

The Board is authorized to adopt rules and establish policies and procedures for the development, adoption, implementation, and evaluation of core curricula, field of study curricula, and a transfer dispute resolution process under Texas Education Code §§61.051 (g), and Texas Education Code §§61.821-831.

RULE §4.23 **Definitions**

The following words and terms, when used in this subchapter, shall have the following meanings, unless the context clearly indicates otherwise.

(1) Board--The Texas Higher Education Coordinating Board.

(2) Commissioner--The Commissioner of Higher Education.

(3) Core Curriculum--the curriculum in the liberal arts, humanities, sciences, and political, social, and cultural history that all undergraduates of an institution of higher education are required to complete before receiving an academic undergraduate degree. Core curriculum provisions apply to public colleges and universities, and to academic degree programs offered at health-related institutions.

(4) Field of Study Curriculum (FOSC)--a set of courses that will satisfy the lower-division requirements for a baccalaureate degree in a specific academic area at a general academic teaching institution. A field of study curriculum affects academic degree programs at public colleges or universities as designated within the particular field of study curriculum.

(5) Course consistent with the Texas Common Course Numbering System (TCCNS)--a lower-division course that meets one of three conditions:

(A) it has an assigned TCCNS number and is listed in the Lower Division Academic Course Guide Manual;

(B) a TCCNS number and inclusion in the Lower Division Academic Course Guide Manual have been requested for the course; or

(C) the institution which offers the course has specified at least one TCCNS course listed in the Lower Division Academic Course Guide Manual that will be accepted in transfer in lieu of the course.

(6) Institution of Higher Education or institution--any public technical institute, public junior college, public senior college or university, medical or dental unit, other agency of higher education as defined in Texas Education Code, §61.003.

(7) The Lower Division Academic Course Guide Manual (ACGM)--an official Board publication that lists a basic core of general academic courses which are freely transferable among all public institutions of higher education in Texas in accordance with the Texas Education Code, §61.051(g). TCCNS numbers are assigned to most courses in the manual.

(8) Faculty member--a person who is employed full-time by an institution of higher education as a member of the faculty whose primary duties include teaching, research, academic service, or administration. However, the term does not include a person holding

RULE §4.24**General Provisions**

(a) All successfully completed lower-division academic courses that are identified by the Texas Common Course Numbering System (TCCNS) and published in the Lower Division Academic Course Guide Manual (ACGM) shall be fully transferable among public institutions and shall be substituted for the equivalent course at the receiving institution. Except in the case of courses belonging to a Board-approved Field of Study Curriculum (FOSC), applicability of transferred courses to requirements for specific degree programs is determined by the receiving institution.

(b) Nothing in this subchapter restricts the authority of an institution of higher education to adopt its own admission standards in compliance with this subchapter or its own grading policies so long as it treats transfer students and native students in the same manner.

(c) Institutional policies regarding acceptance of credit for correspondence courses, credit-by-examination, and other credit-earning instruments must be consistent with Southern Association of Colleges and Schools' guidelines and must treat transfer students and native students in the same manner.

(d) This subchapter applies specifically to academic courses and degree programs, and does not apply to technical courses or technical degree programs.

RULE §4.25**Requirements and Limitations**

- (a) Each institution of higher education shall identify in its undergraduate catalog each lower-division course that is substantially equivalent to an academic course listed in the current edition of the Lower Division Academic Course Guide Manual.
- (b) Each university must offer at least 45 semester credit hours of academic courses that are substantially equivalent to courses listed in the Lower Division Academic Course Guide Manual including those that fulfill the lower-division portion of the institution's Core Curriculum.
- (c) All public colleges and universities must accept transfer of credit for successfully completed courses identified in subsections (a) and (b) of this section as applicable to an associate or baccalaureate degree in the same manner as credit awarded to non-transfer students in that degree program.
- (d) Each institution shall be required to accept in transfer into a baccalaureate degree program the number of lower-division credit hours in the program which are allowed for their non-transfer students in that program; however,
- (1) No institution shall be required to accept in transfer more credit hours in the major area of a degree program than the number set out in any applicable Board-approved Field of Study Curriculum for that program.
- (2) In any degree program for which there is no Board-approved Field of Study Curriculum, no institution shall be required to accept in transfer more lower-division course credit in the major applicable to a baccalaureate degree than the institution allows their non-transfer students in that major.
- (3) An institution of higher education may deny the transfer of credit in courses with a grade of "D" as applicable to the student's field of study curriculum courses, core curriculum courses, or major.
- (e) All senior institutions of higher education in Texas shall provide support services appropriate to meet the needs of transfer students. These support services should be comparable to those provided to non-transfer students regularly enrolled at the institutions, including an orientation program similar to that provided for entering freshman enrollees.
- (f) No university shall be required to accept in transfer or toward a degree program, more than sixty-six (66) semester credit hours of lower-division academic credit. Universities, however, may choose to accept additional credit hours.
-

RULE §4.26

Penalty for Noncompliance with Transfer Rules

If it is determined by the Board that an institution inappropriately or unnecessarily required a student to retake a course that is substantially equivalent to a course already taken at another institution, in violation of the provisions of §4.25 of this title (relating to Requirements and Limitations), formula funding for credit hours in the repeated course will be deducted from the institution's appropriation.

RULE §4.27

Resolution of Transfer Disputes for Lower-Division Courses

(a) The following procedures shall be followed by institutions of higher education in the resolution of credit transfer disputes involving lower-division courses:

(1) If an institution of higher education does not accept course credit earned by a student at another institution of higher education, the receiving institution shall give written notice to the student and to the sending institution that transfer of the course credit is denied, and shall include in that notice the reasons for denying the credit. Attached to the written notice shall be the procedures for resolution of transfer disputes for lower-division courses as outlined in this section, accompanied by clear instructions outlining the procedure for appealing the decision to the Commissioner.

(2) A student who receives notice as specified in paragraph (1) of this subsection may dispute the denial of credit by contacting a designated official at either the sending or the receiving institution.

(3) The two institutions and the student shall attempt to resolve the transfer of the course credit in accordance with Board rules and guidelines.

(4) If the transfer dispute is not resolved to the satisfaction of the student or the sending institution within 45 days after the date the student received written notice of denial, the sending institution may notify the Commissioner in writing of the request for transfer dispute resolution, and the institution that denies the course credit for transfer shall notify the Commissioner in writing of its denial and the reasons for the denial.

(b) The Commissioner or the Commissioner's designee shall make the final determination about a dispute concerning the transfer of course credit and give written notice of the determination to the involved student and institutions.

(c) Each institution of higher education shall publish in its course catalogs the procedures specified in subsections (a), (b), (d), and (e) of this section.

(d) The Board shall collect data on the types of transfer disputes that are reported and the disposition of each case that is considered by the Commissioner or the Commissioner's designee.

(e) If a receiving institution has cause to believe that a course being presented by a student for transfer from another school is not of an acceptable level of quality, it should first contact the sending institution and attempt to resolve the problem. In the event that the two institutions are unable to come to a satisfactory resolution, the receiving institution may notify the Commissioner, who may investigate the course. If its quality is found to be unacceptable, the Board may discontinue funding for the course.

(a) In accordance with Texas Education Code, §§61.821-831, each general academic institution, community college, and health-related institution shall design and implement a core curriculum, including specific courses composing the curriculum, of no less than 42 lower-division semester credit hours. Health-related institutions should encourage their students to complete their core curriculum requirement at a general academic institution or community college.

(b) Each institution's core curriculum must be designed to satisfy the exemplary educational objectives specified for the component areas of the "Core Curriculum: Assumptions and Defining Characteristics" adopted by the Board; all lower-division courses included in the core curriculum must be consistent with the "Texas Common Course Numbering System," and must be consistent with the framework identified in Charts I and II of this subsection. Chart I specifies the minimum number of semester credit hours required in each of five major component areas that a core curriculum must include (with sub-areas noted in parentheses). Chart II specifies options available to institutions for the remaining 6-12 semester credit hours.

Figure: 19 TAC §4.28(b)

Chart I - Institutions must select 36 semester credit hours of the core curriculum according to the parameters described below:

Component Area	Required Semester Credit Hours
010** Communication (English rhetoric/composition)	6
020** Mathematics (logic, college-level algebra equivalent, or above)	3
030** Natural Sciences	6

RULE §4.29**Core Curricula Larger than 42 Semester Credit Hours**

(a) An institution may adopt a core curriculum under this subchapter in excess of 42 semester credit hours, but no more than 48 semester credit hours, if the courses in excess of 42 semester credit hours are selected from the first five component areas of Chart II of §4.28(b) of this title (relating to Core Curriculum) (excluding additional credit in the Institutionally Designated Option) and are approved by the institution's governing board.

(b) No institution may adopt a core curriculum of more than 42 semester credit hours without approval by the Board if the courses in excess of 42 semester credit hours are selected from component areas other than the first five component areas of Chart II of §4.28(b) of this title (relating to Transfer of Credit, Core Curriculum and Field of Study Curricula). The Board may approve a core curriculum under this section if:

- (1) It has been previously approved by the institution's governing board;
 - (2) The institution has provided to the Board a narrative justification of the need and appropriateness of a larger core curriculum that is consistent with its role and mission; and
 - (3) No proposed upper-division core course is substantially comparable in content or depth of study to a lower-division course listed in the "Texas Common Course Numbering System."
-

RULE §4.30**Criteria for Evaluation of Core Curricula**

(a) Each public institution of higher education shall review and evaluate its core curriculum every five years and report the results of that evaluation to the Board. The evaluation should include:

- (1) the extent to which the core curriculum is consistent with the elements of the core curriculum recommended by the Board;
- (2) the extent to which the core curriculum is consistent with the Texas Common Course Numbering System (TCCNS);
- (3) the extent to which the core curriculum is consistent with the elements of the core curriculum component areas, intellectual competencies, and perspectives as expressed in Core Curriculum: Assumptions and Defining Characteristics adopted by the Board; and
- (4) the extent to which the institution's educational goals and the exemplary educational objectives of the core curriculum recommended by the Board are being achieved;

(b) Each institution's evaluation report must contain at least the following:

- (1) a table that compares the institution's core curriculum with the core component areas and exemplary educational objectives of the core curriculum recommended by the Board;
 - (2) a brief description of the purpose and substance of the institution's core curriculum;
 - (3) a description of the processes and procedures used to evaluate the institution's core curriculum; and
 - (4) a description of the ways in which the evaluation results are being or will be utilized to improve the core curriculum at the institution.
-

RULE §4.31

Revision of Existing Approved Core Curricula

(a) Each public institution of higher education that does not already have a Board-approved core curriculum on file must submit its proposed core curriculum to the Board for staff review and approval. The request for approval should include a description of the goals of the core curriculum, a table showing the institution's core curriculum by component area (based on the model found in Charts I and II in §4.28(b) of this title, relating to Core Curriculum), and a complete listing of courses approved by the institution to fulfill core component requirements, organized to reflect each required and supplemental component area of the core curriculum as detailed in the document Core Curriculum: Assumptions and Defining Characteristics, adopted by the Board. Courses should be selected to fulfill component requirements in a core curriculum based at least in part on their ability to meet most of the exemplary educational outcome statements for the component area as described in the document Core Curriculum: Assumptions and Defining Characteristics, adopted by the Board.

(b) An institution should follow these procedures to modify its core curriculum to add or delete courses, change the total number of semester credit hours in a non-required component area, or change the total number of semester credit hours required in its core curriculum:

(1) submit to the Board a letter documenting each change to be made, the component area(s) affected, and a rationale for the change;

(2) requests that involve changing the overall number of semester credit hours in the core curriculum or the number in a given component area require documentation of prior approval by the institution's governing board;

(3) the institution shall receive a letter from the Board staff giving notice of acceptance of the proposed changes and/or indicating any changes that do not meet Board-approved criteria.

(c) Upon receiving an approval letter from Board staff, the institution shall make any required changes to its core curriculum and will document those changes in institutional publications.

RULE §4.32**Field of Study Curricula**

(a) In accordance with Texas Education Code, §61.823, the Board approves field of study curricula for certain fields of study/academic disciplines. Field of study curricula shall be developed with the assistance of advisory committees whose membership includes at least a majority of members who are teaching faculty (as defined by §4.23(8) of this title, relating to Definitions for Core Curriculum and Field of Study Curricula) within the field of study under consideration.

(b) If a student successfully completes a field of study curriculum developed by the Board, that block of courses may be transferred to a general academic teaching institution and must be substituted for that institution's lower-division requirements for the degree program for the field of study into which the student transfers, and the student shall receive full academic credit toward the degree program for the block of courses transferred.

(c) A student who transfers from one institution of higher education to another without completing the field of study curriculum of the sending institution shall receive academic credit in the field of study curriculum of the receiving institution for each of the courses that the student has successfully completed in the field of study curriculum of the sending institution. Following receipt of credit for these courses, the student may be required to satisfy the remaining course requirements in the field of study curriculum of the receiving institution, or to complete additional requirements in the receiving institution's program, as long as those requirements do not duplicate course content already completed through the field of study curriculum.

(d) A student concurrently enrolled at more than one institution of higher education shall follow the field of study curriculum requirements of the institution at which the student is classified as a degree-seeking student.

(e) Each institution must note field of study curriculum courses on student transcripts as recommended by the Texas Association of Collegiate Registrars and Admissions Officers (TACRAO).

(f) Each institution must review and evaluate its procedures for complying with field of study curricula at intervals specified by the Board and shall report the results of that review to the Board. These reports shall be submitted following the same timetable as the regular reports of core curriculum evaluations.

RULE §4.33**Criteria for Evaluation of Field of Study Curricula**

(a) Every five years, each public institution of higher education shall review and evaluate its policies and practices regarding the acceptance and application of credit earned as part of a Board-approved field of study curriculum, and reports the results of that evaluation to the Board. The evaluation should include:

(1) the extent to which the institution's compliance with the acceptance of transfer credit through field of study curricula is being achieved;

(2) the extent to which the institution's application to the appropriate degree program of credit earned as part of a Board-approved field of study curriculum facilitates academic success;

(3) the effectiveness of field of study curricula in the retention and graduation of transfer students in those degree programs that have Board-approved field of study curricula.

(b) Each institution's evaluation report must contain at least the following:

(1) a listing of the institution's degree programs that have Board-approved field of study curricula;

(2) a description of the institution's policies and practices regarding applicable Board-approved field of study curricula, including admission-point evaluation of transfer credit, advising practices (including catalogue and website information on existing field of study curricula and advising/counseling practices for enrolled students), and transcripting practices to show field of study participation and completion;

(3) a chart or table showing the number of total transfer students for each degree program that has a Board-approved field of study curriculum, for each of the last five years; the chart should indicate year-by-year the percentage of students who transferred having completed the applicable field of study curriculum, the percentage of students who transferred without having completed the applicable field of study curriculum, and any information about progress toward graduation or graduation rates that can compare transfer student performance with non-transfer student performance during the evaluation period.

RULE §4.34**Revision of Existing Approved Field of Study Curricula**

(a) The Board shall have the authority to modify or revise a Board-approved field of study curriculum when a need for such a revision is identified, as specified in current Board policy and procedures.

(b) The need for a revision or modification to a Board-approved field of study curriculum may be identified by one the following methods, or by other methods that are similarly appropriate:

(1) notice of a change in licensure, certification, or accreditation standards that would affect the field of study curriculum and lower-division requirements for a field of study or academic discipline;

(2) notice of a change in curricular structure or content that is part of a pervasive change in the academic discipline served by the field of study curriculum, as documented by national or regional professional organizations, faculty organizations, or other indicators of best practices in the discipline;

(3) receipt of a request from at least three public institutions of higher education that are affected by the field of study curriculum under consideration for modification, including at least one two-year and one four-year academic-degree-granting institution. The request and justifications for the request should be made by the chief academic officers of the institutions, in a joint memorandum sent to the Commissioner.

(c) Any proposed modification or revision to a Board-approved field of study curriculum should be evaluated by an advisory committee convened under the conditions cited in §4.30(a) of this title (relating to Criteria for Evaluation of Core Curricula).

Recommendations for modifications or revisions to a Board-approved field of study curriculum should reflect the advice and wisdom of an advisory committee made up primarily of teaching faculty from the academic discipline(s) affected by the field of study curriculum under consideration.

Core Curriculum: Assumptions and Defining Characteristics

APRIL 1998

Senate Bill (SB) 148, enacted in 1997 by the 75th Texas Legislature, requires the Texas Higher Education Coordinating Board to adopt rules that include "a statement of the content, component areas, and objectives of the core curriculum," which each institution is to fulfill by its own selection of specific courses. Those rules are included in Chapter 5, Subchapter S, Sections 5.390 through 5.404. The Coordinating Board has adopted this document in order to provide additional guidance to institutions as they refine their core curricula to comply with SB 148 and the Coordinating Board rules that implement the statute. The Assumptions, Defining Characteristics of Intellectual Competencies, Perspectives, and Exemplary Educational Objectives (listed by component area) contained in this document are derived from the Report of the Advisory Committee on Core Curriculum (1997-98). That Advisory Committee based its work on the 1989 Report of the Subcommittee on Core Curriculum, which the Board received and endorsed in accordance with House Bill 2187 of the 70th Legislature. That legislation required all institutions to adopt, evaluate, and report on an undergraduate core curriculum. Each institution should consider these guiding principles carefully as it proceeds with the revision of its core curriculum.

ASSUMPTIONS

In establishing its guidelines for core curricula, the Board has made the following assumptions:

1. Every institution of higher education is required by law to adopt a core curriculum of no less than 42 semester credit hours which is consistent with the Texas Common Course Numbering System and the statement, recommendations, and rules issued by The Texas Higher Education Coordinating Board.

[The Core Curriculum Advisory Committee (1997-1998) has defined "consistent with the Texas Common Course Numbering System" as meeting one of the following criteria: a) the course already has a common course number, b) application for a common course number has been made, or c) the course is not a common course but at least one common course number that may be accepted in lieu of the course is designated by the institution.]

2. If a student successfully completes the 42-hour core at an institution of higher education, that block of courses must be substituted for the receiving institution's

core curriculum. A student shall receive academic credit for each of the courses transferred and may not be required to take additional core curriculum courses at the receiving institution unless the Board has approved a larger core curriculum at the receiving institution.

3. Students who transfer without completing the core curriculum shall receive academic credit in the core curriculum of the receiving institution for each of the courses that the student has successfully completed in the core curriculum of the sending institution, with certain exceptions noted in the rules [Chapter 5, Subchapter S, Section 5.403 (h)].
4. The basic intellectual competencies discussed in this document -- reading, writing, speaking, listening, critical thinking, and computer literacy -- should inform the components of any core curriculum. Moreover, a core curriculum should contain courses that provide multiple perspectives about the individual and the world in which he or she lives; that stimulate a capacity to discuss and reflect upon individual, political, and social aspects of life so students understand ways in which to exercise responsible citizenship; and that enable students to integrate knowledge and understand the interrelationships of the disciplines.
5. There should be no attempt by the state to prescribe a specific set of core courses or a single core curriculum that would be uniform across all Texas colleges and universities.
6. A core curriculum should be described and assessed by faculty and institutions in terms of basic intellectual competencies and perspectives, and of specified student outcomes, rather than simply in terms of specific courses and course content.

DEFINING CHARACTERISTICS OF BASIC INTELLECTUAL COMPETENCIES IN THE CORE CURRICULUM

The core curriculum guidelines described here are predicated on the judgment that a series of basic intellectual competencies - reading, writing, speaking, listening, critical thinking, and computer literacy - are essential to the learning process in any discipline and thus should inform any core curriculum. Although students can be expected to come to college with some experience in exercising these competencies, they often need further instruction and practice to meet college standards and, later, to succeed in both their major field of academic study and their chosen career or profession.

READING: Reading at the college level means the ability to analyze and interpret a variety of printed materials - books, articles, and documents. A core curriculum should offer students the opportunity to master both general methods of analyzing

printed materials and specific methods for analyzing the subject matter of individual disciplines.

WRITING: Competency in writing is the ability to produce clear, correct, and coherent prose adapted to purpose, occasion, and audience. Although correct grammar, spelling, and punctuation are each a sine qua non in any composition, they do not automatically ensure that the composition itself makes sense or that the writer has much of anything to say. Students need to be familiar with the writing process including how to discover a topic and how to develop and organize it, how to phrase it effectively for their audience. These abilities can be acquired only through practice and reflection.

SPEAKING: Competence in speaking is the ability to communicate orally in clear, coherent, and persuasive language appropriate to purpose, occasion, and audience. Developing this competency includes acquiring poise and developing control of the language through experience in making presentations to small groups, to large groups, and through the media.

LISTENING: Listening at the college level means the ability to analyze and interpret various forms of spoken communication.

CRITICAL THINKING: Critical thinking embraces methods for applying both qualitative and quantitative skills analytically and creatively to subject matter in order to evaluate arguments and to construct alternative strategies. Problem solving is one of the applications of critical thinking, used to address an identified task.

COMPUTER LITERACY: Computer literacy at the college level means the ability to use computer-based technology in communicating, solving problems, and acquiring information. Core-educated students should have an understanding of the limits, problems, and possibilities associated with the use of technology, and should have the tools necessary to evaluate and learn new technologies as they become available.

Some of these intellectual competencies have traditionally been tied to specific courses required of all students during their first two years of college. For example, courses in college composition, together with mathematics have long been the cornerstone experience of the freshman year. But a single course or two-course sequence in college composition can do little more than introduce students to the principles and practices of good writing. Within the boundary of three to six semester credit hours of course work, neither of these sequences can guarantee proficiency. Moreover, in most curricula there are no required courses specifically dedicated to reading or to critical thinking. Thus, if a core curriculum is to prepare students effectively, it is imperative that, insofar as possible, these intellectual competencies

be included among the objectives of many individual core courses and reflected in their course content.

PERSPECTIVES IN THE CORE CURRICULUM

Some of these intellectual competencies have traditionally been tied to specific courses required of all students during their first two years of college. For example, courses in college composition, together with mathematics, have long been the cornerstone experience of the freshman year. But a single course or two-course sequence in college composition can do little more than introduce students to the principles and practices of good writing. Within the boundary of three to six semester credit hours of course work, neither of these sequences can guarantee proficiency. Moreover, in most curricula there are no required courses specifically dedicated to reading or to critical thinking. Thus, if a core curriculum is to prepare students effectively, it is imperative

Another imperative of a core curriculum is that it contain courses that help students attain the following:

1. Establish broad and multiple perspectives on the individual in relationship to the larger society and world in which he or she lives, and to understand the responsibilities of living in a culturally and ethnically diversified world;
2. Stimulate a capacity to discuss and reflect upon individual, political, economic, and social aspects of life in order to understand ways in which to be a responsible member of society;
3. Recognize the importance of maintaining health and wellness;
4. Develop a capacity to use knowledge of how technology and science affect their lives;
5. Develop personal values for ethical behavior;
6. Develop the ability to make aesthetic judgments;
7. Use logical reasoning in problem solving; and
8. Integrate knowledge and understand the interrelationships of the scholarly disciplines.

INSTRUCTION AND CONTENT IN THE CORE CURRICULUM

Education, as distinct from training, demands a knowledge of various contrasting views of human experience in the world. Both the humanities and the visual and performing arts deal with the individual's reaction to the human situation in analytical and creative ways. The social and behavioral sciences deal with the principles and norms that govern human interaction in society and in the production of goods and services. The natural sciences investigate the phenomena of the physical world. Mathematics examines relations among abstract quantities and is the language of the sciences. Composition and communication deal with oral and written language. Each of these disciplines, using its own methodology, offers a different perspective on human experience. Taken together, study in these disciplines provides a breadth of vision against which students can establish and reflect on their own goals and values.

The outcomes specified for the disciplinary areas are thus intended primarily to provide students with a perspective on their experience through an acquaintance with the subject matter and methodology of each discipline. They provide students with the opportunity to understand how these disciplines present varying views of the individual, society, and the world, and of appreciating the methods by which scholars

in a given discipline organize and evaluate data. The perspectives acquired in these studies describe the potential, as well as the limitations, of each discipline in understanding the human experience.

The objective of disciplinary studies within a core curriculum is to foster multiple perspectives as well as to inform and deliver content. Disciplinary courses within a core curriculum should promote outcomes focused on the intellectual core competencies, as well as outcomes related to establishing perspectives, and the basic concepts in the discipline - methods of analysis and interpretation specific to the discipline.

Institutions are urged to consider development and utilization of appropriate interdisciplinary courses as a means of helping students develop multiple perspectives on the individual in relationship to other people and societies. Comparison and contrast of disciplinary perspectives on an issue within the context of a single course can be a particularly effective instructional device.

CORE COMPONENTS AND RELATED EXEMPLARY EDUCATIONAL OBJECTIVES

In designing and implementing a core curriculum of at least 42 semester credit hours, each Texas college and university should select and/or develop courses which satisfy exemplary educational objectives specified for each component area. The following exemplary educational objectives should be used as basic guidelines for selected component areas. Exemplary educational objectives become the basis for faculty and institutional assessment of core components.

Since it is difficult to define exemplary educational objectives for a core curriculum outside of some framework of the general areas of content, the objectives and outcomes described below are suggested as those that meet the intent of Senate Bill 148. The outcomes for student learning provide both guidelines for instruction and a profile of students as they complete each component of a core curriculum. Although these component areas could easily be "translated" directly into disciplinary or departmental terms, it is not necessary to restrict the areas to one or a few departments. These objectives could be met in a number of differing course configurations, including multi-disciplinary courses.

Colleges and universities across the state have specific missions and different roles and scope. The way in which colleges and universities achieve these outcomes will thus vary. These outlines are not intended in any way to impose restrictions on the creativity of the classroom instructor or to dictate pedagogical methods. The emergent profile of the students, however, will presumably have common characteristics insofar as they achieve the specified outcomes. A core curriculum experience will prepare

them to learn effectively through the rest of their college years so that they carry these aptitudes for learning into their life careers.

I. Communication (composition, speech, modern language)

The objective of a communication component of a core curriculum is to enable the student to communicate effectively in clear and correct prose in a style appropriate to the subject, occasion, and audience.

Exemplary Educational Objectives

1. To understand and demonstrate writing and speaking processes through invention, organization, drafting, revision, editing, and presentation.
2. To understand the importance of specifying audience and purpose and to select appropriate communication choices.
3. To understand and appropriately apply modes of expression, i.e., descriptive, expository, narrative, scientific, and self-expressive, in written, visual, and oral communication.
4. To participate effectively in groups with emphasis on listening, critical and reflective thinking, and responding.
5. To understand and apply basic principles of critical thinking, problem solving, and technical proficiency in the development of exposition and argument.
6. To develop the ability to research and write a documented paper and/or to give an oral presentation.

II. Mathematics

The objective of the mathematics component of the core curriculum is to develop a quantitatively literate college graduate. Every college graduate should be able to apply basic mathematical tools in the solution of real-world problems.

Exemplary Educational Objectives

1. To apply arithmetic, algebraic, geometric, higher-order thinking, and statistical methods to modeling and solving real-world situations.
2. To represent and evaluate basic mathematical information verbally, numerically, graphically, and symbolically.
3. To expand mathematical reasoning skills and formal logic to develop convincing mathematical arguments.
4. To use appropriate technology to enhance mathematical thinking and understanding and to solve mathematical problems and judge the reasonableness of the results.
5. To interpret mathematical models such as formulas, graphs, tables and schematics, and draw inferences from them.

6. To recognize the limitations of mathematical and statistical models.
7. To develop the view that mathematics is an evolving discipline, interrelated with human culture, and understand its connections to other disciplines.

III. Natural Sciences

The objective of the study of a natural sciences component of a core curriculum is to enable the student to understand, construct, and evaluate relationships in the natural sciences, and to enable the student to understand the bases for building and testing theories.

Exemplary Educational Objectives

1. To understand and apply method and appropriate technology to the study of natural sciences.
2. To recognize scientific and quantitative methods and the differences between these approaches and other methods of inquiry and to communicate findings, analyses, and interpretation both orally and in writing.
3. To identify and recognize the differences among competing scientific theories.
4. To demonstrate knowledge of the major issues and problems facing modern science, including issues that touch upon ethics, values, and public policies.
5. To demonstrate knowledge of the interdependence of science and technology and their influence on, and contribution to, modern culture.

IV. Humanities And Visual And Performing Arts

The objective of the humanities and visual and performing arts in a core curriculum is to expand students' knowledge of the human condition and human cultures, especially in relation to behaviors, ideas, and values expressed in works of human imagination and thought. Through study in disciplines such as literature, philosophy, and the visual and performing arts, students will engage in critical analysis, form aesthetic judgments, and develop an appreciation of the arts and humanities as fundamental to the health and survival of any society. Students should have experiences in both the arts and humanities.

Exemplary Educational Objectives

1. To demonstrate awareness of the scope and variety of works in the arts and humanities.

2. To understand those works as expressions of individual and human values within an historical and social context.
3. To respond critically to works in the arts and humanities.
4. To engage in the creative process or interpretive performance and comprehend the physical and intellectual demands required of the author or visual or performing artist.
5. To articulate an informed personal reaction to works in the arts and humanities.
6. To develop an appreciation for the aesthetic principles that guide or govern the humanities and arts.
7. To demonstrate knowledge of the influence of literature, philosophy, and/or the arts on intercultural experiences.

V. Social And Behavioral Sciences

The objective of a social and behavioral science component of a core curriculum is to increase students' knowledge of how social and behavioral scientists discover, describe, and explain the behaviors and interactions among individuals, groups, institutions, events, and ideas. Such knowledge will better equip students to understand themselves and the roles they play in addressing the issues facing humanity.

Exemplary Educational Objectives

1. To employ the appropriate methods, technologies, and data that social and behavioral scientists use to investigate the human condition.
2. To examine social institutions and processes across a range of historical periods, social structures, and cultures.
3. To use and critique alternative explanatory systems or theories.
4. To develop and communicate alternative explanations or solutions for contemporary social issues.
5. To analyze the effects of historical, social, political, economic, cultural, and global forces on the area under study.
6. To comprehend the origins and evolution of U.S. and Texas political systems, with a focus on the growth of political institutions, the constitutions of the U.S. and Texas, federalism, civil liberties, and civil and human rights.

7. To understand the evolution and current role of the U.S. in the world.
8. To differentiate and analyze historical evidence (documentary and statistical) and differing points of view.
9. To recognize and apply reasonable criteria for the acceptability of historical evidence and social research.
10. To analyze, critically assess, and develop creative solutions to public policy problems.
11. To recognize and assume one's responsibility as a citizen in a democratic society by learning to think for oneself, by engaging in public discourse, and by obtaining information through the news media and other appropriate information sources about politics and public policy.
12. To identify and understand differences and commonalities within diverse cultures.

VI. INSTITUTIONALLY DESIGNATED OPTION

An institution may wish to include in its core curriculum courses that address exemplary educational objectives not covered in the preceding broad discipline categories. Such courses may include computer literacy, kinesiology, health/wellness, interdisciplinary or linked courses, or other courses that address a specific institutional role and mission.
