

THE TEXAS PUBLIC COMMUNITY COLLEGE DATABASE SYSTEM
Ratio Comparison Trends - All Institutions
For Fiscal Years 1997 through 2001

Ratio # 1	Net Total Current Fund Revenues to Total Current Fund Revenues
Objective:	This ratio indicates whether total current operations resulted in a surplus or a deficit. It answers the question "Did the reporting institution live within its means during the year?"
Formula:	Net Total Current Fund Revenues / Total Current Fund Revenues
Assessment Instructions:	A negative ratio indicates a deficit. Small deficits may be relatively unimportant if the institution is financially strong, but large deficits are almost always a bad sign, particularly if they occur in successive years. A positive ratio indicates a surplus. Generally speaking, the larger the surplus, the stronger the institution's financial position as a result of operations. The trend of this ratio should be analyzed closely. A large surplus or deficit will directly affect the size of expendable fund balances (see also ratio numbers 16 and 18).
Issue Areas:	This ratio can be used in assessing issues related to Sources of Funds and Uses of Funds.

THE TEXAS PUBLIC COMMUNITY COLLEGE DATABASE SYSTEM

Ratio Comparison Trends - All Institutions

For Fiscal Years 1997 through 2001

Ratio # 2

Net Unrestricted Revenues to Total Unrestricted Revenues

Objective:

This ratio indicates whether the revenues available for the Unrestricted functions of the institution were sufficient to meet the expenditures for those functions.

Formula:

Net Unrestricted Revenues / Total Unrestricted Revenues

Assessment Instructions:

A negative ratio indicates that other sources of financing were needed to support Unrestricted activities. A positive ratio establishes that Unrestricted activities were at least self-sufficient for the year. For institutions with limited sources of new revenues and small expendable fund balances, as reflected in ratio numbers 16 and 18, a sizable positive ratio of net Unrestricted revenues to total Unrestricted revenues may be essential as the only means whereby the institution can accumulate reserves to meet future needs.

Issue Areas:

This ratio can be used in assessing issues related to Sources of Funds and Uses of Funds.

THE TEXAS PUBLIC COMMUNITY COLLEGE DATABASE SYSTEM
Ratio Comparison Trends - All Institutions
For Fiscal Years 1997 through 2001

Ratio # 16 Expendable Fund Balances to Total Expenditures and Mandatory Transfers

Objective: This ratio describes the institution's ability to support its current level of operations from all available expendable resources without considering revenues generated from operations. It is an important measure of financial strength relative to institutional operating size.

Formula: Expendable Fund Balances / Total Expenditures and Mandatory Transfers

Assessment Instructions: No absolute value that would indicate that an institution is clearly financially healthy has been identified for ratio number 16. Experience suggests, however, that a ratio of 0.3 or better would be required to significantly reinforce the ratio of expendable fund balances to plant debt (ratio number 18). The trend of this ratio is the most important concern.

Issue Areas: This ratio can be used in assessing issues related to Expendable Fund Balances, Uses of Funds, and Transfers (Mandatory).

THE TEXAS PUBLIC COMMUNITY COLLEGE DATABASE SYSTEM
Ratio Comparison Trends - All Institutions
For Fiscal Years 1997 through 2001

Ratio # 22 State Government Revenues (Unrestricted Funds) to Total Unrestricted Expenditures and Mandatory Transfers

Objective: This ratio shows the institution's dependence on state government to support certain Unrestricted expenditures.

Formula: State Government Revenues (Unrestricted Funds) / Total Unrestricted Expenditures and Mandatory Transfers

Assessment Instructions: There is no absolute threshold for this ratio. State government revenues increase or decrease because of changes in enrollment or the rate per contact hour used. A declining trend in this ratio suggests either that revenues derived through the formulas are declining or that expenditures are rising faster than revenues. Such a trend would be of concern, since other sources of revenue - most likely tuition and fees - would have to be increased and costs decreased.

Issue Areas: This ratio can be used in assessing issues related to Debt Service, Sources of Funds , Transfers (Mandatory), and Uses of Funds.

Institution	FY 2001		FY 2000		FY 1999		FY 1998		FY 1997
