

CCCCD Syllabi

Collin County Community College District is committed to your success as a student. With this in mind, we have created generic course syllabi for each academic course we offer. This will permit you to review the course with greater detail than that which we can provide in our catalog descriptions. You will find listed expected learning outcomes and in many cases the materials required for each course. The faculty member teaching each course may provide further details to you via the Instructor Syllabus given out in class or available on the faculty member's website.

The generic syllabi are organized by course number within their academic division.

- **Syllabi by academic division**
 - [Business and Computer Science](#)
 - [Communications & Humanities](#)
