

Before you open these Excel files!

These files are created with some coding. For seeing the completely file correctly, please release your "Developer" in Excel.

1. Find and go into "Options" under the "File" tab which is on the top-left side in any Excel file.
2. Click "Customize Ribbon" on the left side while the box "Excel Options" pops up.
3. Check "Developer" on the right side under the Main Tabs.
4. Click the button "OK". Now you just release your developer (macro) function in Excel.
